

Darling Dolphins Childcare

🐬 About the Owner 🐬

She is married to her high school sweetheart and they have a son and a daughter together. She opened her small licensed home childcare in 2020 and she graduated with a Masters degree in Education in 2021 while running her childcare business. After her own children started school, she worked many years as an infant and toddler teacher after completing her Associates degree in Early Childhood Education in 2013. She nannied for a family with three young children part time while completing her Bachelors degree in Human Services in 2017. She then worked in the social services field with young children and teens and volunteered as a Court Appointed Specialist Advocate for a few years. Helping educate, nurture and take care of little ones is her passion. She loves her job and feels so grateful to be part of each child's lives!

She has a kind and sensitive heart. She loves marine life and loves going on adventures to the ocean with her family. She loves music and reading and enjoys going on walks with their two dogs and spending time with her family and their pets. They are a very close-knit family. They are her whole heart and what keeps her growing, learning and working hard to provide.

Her teenage daughter helps her during the Summertime and on the Saturday evenings that they provide childcare once a month. Her daughter also volunteers every Sunday at the Humane Society. Her husband and young adult son both have full time jobs outside of the home and are busy working on their cars and motorcycles, keeping

up with yard work and taking care of their animals in their free time.

💰 Disability Statement 💰

The owner has an invisible disability/ physical impairment due to IBD and Ulcerative Colitis In her 20's. After two years in and out of the hospital, many surgeries and being in the ICU recovering, this final surgery saved her life. She is so grateful to be alive to see her children grow up, be a wife and help children learn and grow.

She has a medical card from her doctor to always have access to a restroom and medical supplies. This information is only given to help others understand, educate and to advocate for herself. Her physical impairment does not affect her ability to provide quality childcare. It just means she must overcome challenges and use medical supplies in her daily life. She has been living with it for almost 15 years now. Her physical impairment is protected under the Americans with Disabilities Act (ADA).

Sometimes the greatest battles are the ones no one else can see. Please be kind always.

The Owner and her family
